## Choosing the Right Carrier® Supra® Cab Command: Avoiding Costly Mistakes

When it comes to transport refrigeration units, **cab commands** might be small, but they play a big role in daily operations. For **Carrier® Supra® systems**, picking the correct cab command isn't just a matter of plug-and-play—it's a critical decision that can save your technicians time and prevent installation issues.

At Myriad Parts, we often hear from customers who've ordered a cab command based on how it looks—only to discover it doesn't work with their specific unit. The problem? Many of these commands look nearly identical from the outside but are **not interchangeable**. Let's clear up the confusion.

### Why the Right Cab Command Matters

Every Carrier® Supra® range has different electrical requirements and software configurations. Choosing the wrong cab command can result in:

- Installation delays
- Fault codes or system failures
- Unresponsive interfaces
- Costly returns or unnecessary downtime

Knowing your unit type and configuration is key to ordering the correct replacement.

### Quick Guide: Which Cab Command Do You Need?

Here's a breakdown of the most commonly used cab commands and which Carrier® Supra® units they are designed to fit:

## Single Temperature Units

For use with:

**Carrier® Supra 1050 / 1150 / 1250 –**

Single Temp only

**OEM Part No.:** 12-00773-00

**Myriad Part No.:** MPN3086

## Don't Guess—Get in Touch

Still unsure which cab command you need? Our team is here to help. Whether you're a technician, parts buyer, or fleet operator, we can walk you through your options and make sure you're ordering the correct unit.

**Tip:** When ordering, always confirm the **model and configuration** of your Supra unit (Single Temp vs Multi Temp vs HE or legacy). A quick check upfront can prevent a costly mistake later.

**Need assistance?** Email us at [info@myriadparts.com](mailto:info@myriadparts.com) or call +44 (0) 2380 71 01 68.

## Conclusion

Choosing the right cab command might seem like a small detail—but as we say at Myriad, “the devil’s in the details.” Make sure you're fitting the correct control for your Carrier® Supra® range and keep your refrigerated fleet moving efficiently.
